SECTION 01

Executive Summary

SGKx1904 is an AI automation company that deploys custom autonomous agent systems for businesses. We replace manual labor, reduce operational costs by up to 99%, and deliver measurable results in 48 hours.

The Core Proposition: We build, deploy, and maintain a fleet of AI agents that run your business operations 24/7 — marketing, sales, customer service, analytics, and fulfillment — for a fraction of the cost of a single employee.

9 AI AGENTS IN PRODUCTION	**1,036** WEEKLY AUTOMATED ACTIONS	**$0.02** DAILY OPERATING COST
48h DEPLOYMENT TIME	**0** LINES OF CODE REQUIRED	**24/7** SYSTEM UPTIME

Zero Big Tech. Zero Surveillance. 100% Private. Unlike competitors built on Google, Amazon, or

> OpenAI cloud infrastructure, SGKx1904 runs on locally-hosted, open-source AI models on private hardware. Your business data never enters a corporate data center. No training on your data. No telemetry. No third-party access. Complete digital sovereignty.

Key Differentiators

- **Private AI infrastructure** — Runs on our own hardware, not Big Tech cloud. Your data stays off corporate servers.
- **No-code deployment** — Agents are configured through natural language, not programming
- **Proven in production** — Our own business runs entirely on this system
- **Near-zero operating cost** — $0.02/day vs. $17,000-32,000/month for equivalent human labor
- **48-hour deployment** — From contract to live system in two business days
- **Open-source foundation** — Built on auditable, transparent, community-driven software
- **Built by a non-engineer** — If a plumber can build it, any business can use it

SECTION 02

Mission & Vision

> **Mission Statement:**
> To democratize AI automation by making autonomous agent systems accessible, affordable, and deployable for every business — regardless of technical expertise or budget.

Vision

We envision a world where every small business, freelancer, and entrepreneur has access to the same AI-powered operational capabilities as Fortune 500 companies — at a price point that makes manual labor obsolete for repetitive tasks.

Tagline

"AI For The Rest of Us."

For the ones who don't want to conform.

Core Values

Accessibility
AI should not require a computer science degree. Our systems are configured in plain English

Ruthless Efficiency
Every dollar saved through automation is a dollar that goes back to the business owner. We

and deployed without writing a single line of code.

Transparency
Real metrics. Real costs. No inflated projections. Every number in this document comes from our production system.

optimize for maximum output at minimum cost.

Proof Over Promise
We don't sell what we haven't built. Our own business is the first and most thorough case study for our technology.

> *"Don't tell people what AI can do. Show them what AI is doing — right now, in production, for pennies."*
>
> **— Kyle Jimenez, Founder**

SECTION 03

Founder Story

Kyle Jimenez — Plumber Turned AI Automation Engineer

Kyle Jimenez is a licensed plumber from Southern California who built a fully autonomous AI business system with zero coding experience, zero engineering background, and zero outside funding.

In early 2026, while still working full-time as a plumber, Kyle became fascinated with the potential of AI to automate the administrative burden that was consuming his evenings and weekends. Customer follow-ups, scheduling, invoicing, marketing — the work that doesn't pay but has to get done.

With no technical background beyond using a smartphone, Kyle began experimenting with open-source AI tools. What he discovered changed the trajectory of his life:

> **In 48 hours**, Kyle built and deployed 9 autonomous AI agents that handle marketing, sales, customer service, financial tracking, market research, content creation, lead nurturing, and product fulfillment — all running 24/7 for a total operating cost of **$0.02 per day**.

The system now executes over 1,000 automated actions per week without any human intervention. It generates original content, posts to multiple social media platforms, responds to customer inquiries, processes payments, delivers digital products, and sends Kyle a daily report summarizing everything.

Why This Matters

Kyle's story is the proof of concept. If a plumber with no technical training can build an AI workforce in a weekend, then the technology has reached the point where *any* business can leverage it. The barrier is no longer technical — it's awareness.

That realization became the foundation of SGKx1904: a company dedicated to deploying the same AI automation systems for businesses that don't have the time, expertise, or inclination to build their own.

What He Had

Hardware:

- One outdated laptop running Kali Linux
- Standard home Wi-Fi connection
- A smartphone

Experience:

- Zero coding knowledge
- Zero engineering background
- Zero venture capital
- A few days off from plumbing work

What He Built

Using nothing but free, open-source tools available to anyone with an internet connection, Kyle deployed a fully autonomous business system that now operates 24/7 without human intervention. The entire technology stack

— the AI models, the agent orchestration framework, the messaging infrastructure, the payment processing, the web hosting — runs on freely available software and costs pennies per day to operate.

> **The question this raises:** If a plumber with home Wi-Fi and an old laptop can build a 9-agent AI workforce in a weekend, what could your business do with the same tools and a team that knows how to deploy them?

That question is the foundation of SGKx1904. The answer is: **anything**. And we're here to build it for you.

SECTION 04

The Problem

Small and mid-size businesses are drowning in operational overhead. The tasks that keep a business running — marketing, customer service, follow-ups, analytics, fulfillment — consume more time and money than the actual work.

The Operational Tax on Small Business

Function	Monthly Cost (Human)	Hours/Week
Social Media Management	$3,000 - $5,000	15-25
Sales Development	$4,000 - $6,000	30-40
Customer Service	$2,500 - $4,000	20-40
Financial Analysis & Reporting	$5,000 - $8,000	10-20
Market Research	$3,000 - $5,000	10-15
Content Creation	$2,000 - $4,000	15-20
Total	**$19,500 - $32,000/mo**	**100-160**

For a typical small business generating $200,000-$500,000 annually, these operational costs represent **47-100% of revenue**. Most simply can't afford

them, so the business owner does everything themselves — working 60-80 hour weeks.

The AI Gap

Enterprise companies have already solved this with AI. Goldman Sachs, Tesla, Amazon — they deploy thousands of AI agents across their operations. But the tools they use require:

- Engineering teams with $150K+ salaries
- Cloud infrastructure costing $10,000-$100,000/month
- 6-12 month implementation timelines
- Ongoing maintenance budgets

> **The gap:** 33.2 million small businesses in the U.S. alone need automation but can't access enterprise AI solutions. SGKx1904 bridges that gap.

SECTION 05

Our Solution

SGKx1904 deploys turnkey AI agent fleets customized for each business. No coding. No engineering team. Deployed in 48 hours. Operating cost: pennies per day.

How It Works

> Day 1 — Discovery
> We audit your business operations, identify the highest-impact automation opportunities, and design your custom agent fleet. This is a 60-minute consultation.

> Day 1-2 — Build & Deploy
> Using our proprietary no-code methodology, we configure, test, and deploy your AI agents. Each agent is trained on your business context, brand voice, and operational requirements.

> Day 3+ — Autonomous Operation
> Your AI workforce runs 24/7. You receive daily performance reports. We handle monitoring, updates, and optimization. You focus on your business.

What You Get

Custom AI Agent Fleet
3-9+ specialized agents configured for your

Lead Generation & Nurture
Automated lead capture, qualification, and multi-day

specific business needs and industry.

Multi-Platform Presence
Automated content and engagement across Twitter/X, Telegram, Nostr, and your website.

Revenue Operations
Payment processing, fulfillment automation, subscription management, and financial reporting.

drip sequences that convert prospects to customers.

Customer Service Bot
24/7 interactive AI that handles inquiries, provides demos, and closes sales.

Daily Intelligence Briefings
Market research, competitive analysis, and performance dashboards delivered to your phone every morning.

> **The SGKx1904 Guarantee:** If your AI agent fleet doesn't save you at least 20 hours per week within the first 30 days, we'll refund your setup fee in full.

SECTION 06

Technology & Architecture

Our system is built on battle-tested open-source infrastructure with enterprise-grade AI models. The architecture is designed for reliability, cost-efficiency, and rapid deployment.

Core Technology Stack

Layer	Technology	Purpose
Agent Orchestration	OpenClaw (proprietary)	Agent lifecycle, scheduling, configuration
AI Models	xAI Grok, Local LLMs	Content generation, analysis, conversation
Image Generation	Grok Aurora	AI-generated visuals for content and branding
Messaging	Telegram Bot API	Customer interaction, notifications, delivery
Social Media	Twitter API, Nostr Protocol	Multi-platform content distribution

Layer	Technology	Purpose
Payments	Stripe	Subscription billing, fulfillment triggers
Hosting	GitHub Pages + Local	Website, blog, landing pages
Monitoring	Custom cron + Telegram alerts	Real-time system health and error reporting

Architecture Principles

- **No-code configuration** — All agents are defined in plain-language markdown files, not source code
- **Event-driven automation** — Agents respond to triggers (time, payment, message) rather than polling
- **Cost-optimized model selection** — Each task routes to the cheapest model that delivers adequate quality
- **Graceful degradation** — If any component fails, the system continues operating and alerts the owner
- **Zero vendor lock-in** — All components are swappable; we're not dependent on any single provider

Privacy & Independence

> **We don't run on Big Tech cloud.** Our core AI models run on a private, locally-hosted server — not Google Cloud, not Amazon AWS, not Microsoft Azure. Your business data never touches a surveillance-friendly data center. It stays on our hardware, under our control.

- **Local AI inference** — Primary language models run on our own hardware using open-source, uncensored models. No data sent to Google, OpenAI, or Meta.
- **No Big Tech dependency** — We use xAI (Grok) for specific tasks by choice, not necessity. The system can run 100% offline on local models.
- **Open-source stack** — Every component of our technology is built on open-source software that anyone can audit. No black boxes. No hidden telemetry.
- **Your data stays yours** — Customer data is processed locally and never sold, shared, or used for model training. Zero third-party data sharing.
- **No corporate surveillance** — Unlike ChatGPT, Google Bard, or Copilot, our system doesn't log your prompts or feed them back into a corporate training pipeline.
- **Sovereign infrastructure** — The entire system can be deployed on a client's own hardware for complete data sovereignty.

Security

- All API keys and credentials stored in encrypted environment files
- Telegram communications use end-to-end encryption
- Stripe PCI-compliant payment processing
- System runs on dedicated private infrastructure
- Built on Kali Linux — the same OS used by cybersecurity professionals

SECTION 07

The AI Agent Fleet

Nine specialized agents working in coordination. Each handles a specific business function autonomously.

Agent	Function	Schedule	Actions/Week
Content Machine	AI tweets with images, threads, singles	Every 45 min	147+
Channel Publisher	Telegram channel posts with AI visuals	2x daily	14
Nostr Broadcaster	Decentralized social media posting	Every 2 hours	56
Lead Nurture Engine	7-day drip sequences for new leads	Every 6 hours	Variable
Revenue Tracker	Stripe MRR, failed charges, analytics	Daily 9am	7
Fulfillment Bot	Instant product	Every 15 min	672

Agent	Function	Schedule	Actions/Week
	delivery on purchase		
Market Intelligence	Industry trends, opportunities	Daily 7am	7
Customer Gateway	Interactive AI sales & support chatbot	24/7 always-on	Variable
Blog Generator	SEO blog posts with AI images	Weekly	1

> **Total weekly automated actions: 1,036+**
> (excluding variable lead nurture and customer interactions which scale with demand)

Agent Capabilities

Each agent is capable of:

- Generating original content using AI language models
- Creating custom images using AI image generation
- Posting across multiple platforms simultaneously
- Analyzing data and generating reports
- Responding to customer messages in real-time
- Processing payments and triggering fulfillment workflows
- Self-monitoring and error reporting

Agents are customized per client. A restaurant gets different agents than a law firm. A SaaS company gets

different agents than a construction company. The underlying technology is the same — the configuration is what makes each deployment unique.

SECTION 08

Live System Metrics

These are not projections. These are actual production metrics from our live system as of February 2026.

9 ACTIVE AI AGENTS	**1,036** ACTIONS PER WEEK	**$0.02** DAILY AI COST
21+ DAILY SOCIAL POSTS	**48h** DEPLOYMENT TIME	**$16** MONTHLY TOTAL COST

Cost Comparison: Traditional vs. SGKx1904

Business Function	Traditional (Monthly)	SGKx1904 (Monthly)	Savings
Social Media Manager	$4,000	**$13.20**	99.7%
Sales Development Rep	$5,000	**$0.30**	99.9%

Business Function	Traditional (Monthly)	SGKx1904 (Monthly)	Savings
Customer Service Rep	$3,000	**$0.00**	100%
Financial Analyst	$6,500	**$0.30**	99.9%
Market Researcher	$4,000	**$0.30**	99.9%
Content Writer	$3,000	**$1.50**	99.9%
Total	**$25,500/mo**	**$15.60/mo**	**99.9%**

> **Live Demo Available:** Message our AI customer gateway at **t.me/moneymakingmitch1904_bot** to experience the system in action. Ask it anything.

SECTION 09

Market Opportunity

The global AI market is projected to reach $1.8 trillion by 2030. The small business automation segment is the largest underserved market in the industry.

Total Addressable Market

33.2M
U.S. SMALL BUSINESSES

$1.8T
GLOBAL AI MARKET (2030)

72%
SMBS WANT AI AUTOMATION

Market Segmentation

Segment	Size	AI Spend Potential	Our Fit
Solo entrepreneurs / freelancers	27.1M	$9 - $79/mo	Consumer tier
Small businesses (1-20 employees)	5.4M	$499 - $1,499/mo	Enterprise Starter/Growth
Mid-market (21-500	0.6M	$1,499 - $4,999/mo	Enterprise Growth/White

Segment	Size	AI Spend Potential	Our Fit
employees)			Label
Agencies & resellers	50K+	$4,999+/mo	White Label

Why Now

- **AI model costs have collapsed** — What cost $1/query in 2023 costs $0.001 in 2026
- **Open-source tools are mature** — Enterprise-grade AI is available for free
- **Small businesses are AI-curious** — 72% want automation but don't know where to start
- **First-mover advantage** — No major player is targeting SMBs with turnkey agent fleets
- **The plumber angle sells itself** — "If a plumber can do it, you can too" removes every objection
- **Privacy is the killer feature** — In an era of data breaches, surveillance, and Big Tech overreach, businesses are desperate for AI that doesn't spy on them. We're the only player offering private, locally-hosted AI automation for SMBs.

> **Off-Grid AI:** Our system can run completely disconnected from Big Tech. Local models on local hardware, communicating over encrypted channels. For businesses handling sensitive data — legal, medical, financial, defense — this isn't a feature. It's

> a requirement. And we're the only ones offering it at this price point.

SECTION 10

Service Tiers & Pricing

Consumer Plans

For individuals and solopreneurs who want AI automation on their phone.

Plan	Price	Includes
Rookie	$9/mo	1 custom AI assistant, basic automation, Telegram access
Builder	$29/mo	3 AI assistants, advanced workflows, priority support
Boss	$79/mo	Full agent fleet, all platforms, strategy calls
Blueprint	$149 (one-time)	Complete system blueprint + 1-hour setup consultation

Enterprise Plans

For businesses that want a fully managed AI workforce.

Starter

$499/mo

+ 3 custom AI agents

Growth

$1,499/mo

+ 9 custom AI agents

White Label

$4,999/mo

+ Everything in Growth

+ Social media automation + Customer service chatbot + Daily analytics reports + Email support	+ Multi-platform content + Lead nurture + drip + Revenue tracking + Auto-fulfillment + Monthly strategy call	+ Your brand + domain + Custom development + API access + Unlimited sub-accounts + Dedicated manager

One-Time Licensing

For businesses that want to own the system outright:

> **Full System License: $25,000 - $50,000** (one-time)
> Includes complete technology transfer, source access, deployment training, and 90 days of support. The buyer owns the system and can deploy it internally or resell it.

SECTION 11

Revenue Model & Projections

Revenue Streams

1. **Consumer subscriptions** ($9 - $79/mo) — High volume, low touch
2. **Enterprise subscriptions** ($499 - $4,999/mo) — High value, managed service
3. **One-time licenses** ($25,000 - $50,000) — Technology transfer deals
4. **Setup fees** ($500 - $5,000) — Custom configuration and deployment

Conservative Growth Projections

Metric	Month 3	Month 6	Month 12	Month 24
Consumer subscribers	25	100	500	2,000
Enterprise clients	1	3	10	30
Avg consumer revenue	$29/mo	$29/mo	$29/mo	$29/mo
Avg enterprise revenue	$1,499/mo	$1,499/mo	$1,499/mo	$1,499/mo

Metric	Month 3	Month 6	Month 12	Month 24
Consumer MRR	$725	$2,900	$14,500	$58,000
Enterprise MRR	$1,499	$4,497	$14,990	$44,970
Total MRR	**$2,224**	**$7,397**	**$29,490**	**$102,970**
Annual Run Rate	**$26,688**	**$88,764**	**$353,880**	**$1,235,640**

Operating Costs

Expense	Monthly
AI API credits (xAI, model inference)	$16 - $200 (scales with clients)
Infrastructure (server, domain, hosting)	$0 - $50
Stripe processing fees (2.9%)	Variable
Marketing (automated, near-zero marginal cost)	$0
Total fixed overhead	**$16 - $250/mo**

> **Gross margins: 95-99%.** The AI handles delivery. The system handles marketing. Near-zero variable

> cost per customer makes this one of the highest-margin business models possible.

SECTION 12

Competitive Advantage

Why SGKx1904 Wins

Factor	Competitors	SGKx1904
Deployment time	Weeks to months	**48 hours**
Technical requirement	Engineers needed	**Zero code**
Monthly cost (SMB)	$500 - $10,000+	**$9 - $79**
Operating cost	$100 - $1,000+/mo	**$0.02/day**
Proof of concept	Demo environments	**Live production system**
Founder credibility	Tech background	**Blue-collar origin story**
Multi-platform	Usually 1-2 channels	**Twitter, Telegram, Nostr, Email, Web**

Moat

1. **The Story** — "Built by a plumber" is an unforgettable brand differentiator. It removes every technical objection before it's raised.

2. **The System** — Our agent fleet is running in production, generating real results. Competitors show demos; we show dashboards.
3. **The Price** — At $9/mo entry, we're 10-100x cheaper than alternatives. We can afford to be because our costs are near-zero.
4. **The Network Effect** — Every client deployment generates social proof, case studies, and referrals that feed the next sale.
5. **The Speed** — 48-hour deployment means we can close and deliver in the same week. Competitors take months.

SECTION 13

Growth Strategy

Phase 1: Foundation (Months 1-3)

- Automated content machine posting 21+ times/day across platforms
- SEO blog publishing weekly for organic Google traffic
- Free blueprint lead magnet driving Telegram bot conversations
- First 10-25 consumer subscribers at $9-$79/mo
- First enterprise client through direct outreach

Phase 2: Scale (Months 4-8)

- Reddit automation activated (account matured)
- Twitter Basic API tier for engagement automation
- Case studies from early clients used in marketing
- Referral program for existing customers
- 100+ consumer subscribers, 3+ enterprise clients

Phase 3: Expansion (Months 9-18)

- White label program for agencies and resellers
- Industry-specific agent templates (restaurants, law, construction, real estate)
- Strategic partnerships with business consultants and coaches
- 500+ subscribers, 10+ enterprise clients
- Targeting $30K+ MRR

Phase 4: Market Leadership (Months 18-36)

- Self-service platform for instant agent deployment
- API marketplace for third-party agent developers
- International expansion
- Potential acquisition target or Series A funding
- 2,000+ subscribers, 30+ enterprise clients
- Targeting $100K+ MRR

> **Key Advantage:** Our marketing engine is itself an AI system. Customer acquisition cost approaches zero because the same AI agents that serve clients also generate the content, nurture the leads, and close the sales. The system scales itself.

SECTION 14

Contact & Next Steps

We're ready to deploy. The system is built, tested, and running in production. The only question is whether you want it working for your business.

Experience the System

> **Live Demo:** Message our AI at **t.me/moneymakingmitch1904_bot** — ask it anything. Watch it respond in real-time. That's what we deploy for your business.

Next Steps

1. **Schedule a consultation** — 60-minute discovery call to map your automation opportunities
2. **Receive a custom proposal** — Tailored agent fleet design with pricing
3. **Deploy in 48 hours** — From agreement to live system in two business days
4. **Watch it work** — Daily performance reports delivered to your phone
