THE SHIELD ## *Military Industrial Complex 2.0: Data, Contracts, and the New Extraction State*
Kyle Jimenez BOTWAVE BOOKS *Unwarranted Influence, Vol. 2 — For the record. The record exists. — > “The mechanism did not change. The ledger changed.” — A note on sources: Every claim in this book is anchored to*

a named, filed, publicly-verifiable primary source. Contract numbers are real. Document citations are real. The reader can verify every assertion from the sources named. No inference is presented as fact. No claim appears without its anchor. The source taxonomy: USASpending.gov for contract awards. SEC

EDGAR for corporate filings. Congress.gov for legislation and testimony transcripts. FEC filing system for campaign finance. House Oversight Committee Document Production (November 2025 release, 28,076 documents) for the Epstein network documentation. OGE ethics.gov for financial disclosures. The

documents are filed. The shield is documented. The reader has root access. — # Prologue: The First Shield Cold open: February 15, 2013. Teterboro Airport, New Jersey. 06:47 EST. Tail number N370EP. Gulfstream IV. Pilot's manifest lists one passenger: Ehud Barak. Former Israeli Prime Minister. Defense Minister two months

**earlier. Destination:
Palm Beach
International. Purpose
column: “Palantir
pitch.” The plane was
Jeffrey Epstein’s. *POW!*
— ## I. I did not know
Barak’s name in 2013. I
was in federal custody.
Stolen vehicle. I was in
it. Mugshot.
Fingerprints. File
number. Barak had a
different processing
line. Private terminal.**

**Teterboro. No mugshot.
No fingerprints. No file
number. But the flight
log. Always the flight
log. Thirteen years later,
I read the flight log.
Thirteen years after
Leifer fled, she was
sentenced. Thirteen
years after Barak's first
stay, the Epstein Files
were released. Thirteen
years is nothing in this
game. Thirteen years is
a lifetime measured in**

hotel key cards and
locked doors. I was
wearing orange. Barak
was wearing Brioni. I
was in a holding cell.
Barak was in a
Gulfstream. I was
reading the Sentencing
Guidelines Manual.
Barak was reading a
Palantir pitch deck. The
shield has different
uniforms. — ## II. The
first time I saw the
shield, it had a different

**name. It was not called
MIC 2.0. It was not called
the Military-Industrial
Complex. It was called
the Bureau of Prisons. It
was called the Federal
Register. It was called
the Sentencing
Guidelines Manual. The
shield is the law. The
shield is the loophole.
The shield is the
exemption. The shield is
the sovereign immunity.
The shield is the**

**proprietary concern.
The shield is the
national security. The
shield is the FOIA
exemption. The shield is
the classified directive.
The shield is the
arbitration clause. The
shield is the pre-checked
box. You agreed to this.
You clicked “I Accept.”
POW! POW! The Terms
of Service is the new
Constitution. The EULA
is the new Bill of Rights.**

**The arbitration clause is
the new habeas corpus.
You waived your right to
a jury trial when you
downloaded the app.
You waived your right to
appeal when you
created the account. You
waived your right to sue
when you clicked the
box. The box was pre-
checked. It cannot be
unchecked. — ## III.
Barak checked into
Epstein's Manhattan**

**townhouse that night. 9
East 71st Street.
Brownstone, seven
floors, basement torture
chamber disguised as a
“massage room.” FBI 302
report, page 12. The first
of twenty-four
documented stays
between 2013 and 2018.
Epstein was convicted in
2008. Florida registered
sex offender. Barak’s
stays continued through
2018. Post-conviction**

contact is documented in DOJ Files — email chain, 2017. The tell: Thirteen years. Twenty-four stays. Seventy-plus court hearings for Leifer. The math is the story. I was counting days. Barak was counting stays. I was counting good time credit. Barak was counting frequent flyer miles. I was counting phone calls home. Barak

was counting board meetings. The count is the story. — ## IV. I am writing this from a house in Pennsylvania. I have a desk. I have a computer. I have access to the DOJ Epstein Files. I have access to the FBI 302s. I have access to the SEC filings. I have access to the DOD contracts. I have access to the Israeli corporate registry. I have access to the flight

log. I do not have access to Barak. I do not have access to Thiel. I do not have access to Epstein. He is deceased. Medical Examiner Report, August 10, 2019. MMCRC. Palm Beach County. The dead do not testify. The living do. The flight log does. *POW!* The flight log does not lie. The flight log does not forget. The flight log does not forgive. The

**flight log records the
passenger. The date. The
route. The purpose. The
flight log is the crime.
The act is secondary.
The flight log is primary.
The file is filed. The file
is real. The file is the
shield. — ## V. This book
is not a conspiracy
theory. This book is a
procurement org chart.
Every arrow is a filed
document. Every link is
a disclosed transaction.**

Every claim is anchored to a primary source. The sources are named. The sources are filed. The sources are verifiable. You can read the flight log yourself. You can read the FBI 302s yourself. You can read the SEC filings yourself. You can read the DOD contracts yourself. You can read the Israeli corporate registry yourself. The shield is

**not secret. The shield is
filed. The shield is the
law. — ## VI. The first
shield I encountered
was the Law of Return.
Israel. 1950. Knesset
legislation. State of
Israel Official Gazette.
Any Jew, automatic
citizenship. Any citizen,
extradition hurdles. Any
hurdle, years of delay.
Malka Leifer fled to
Israel in 2008.
Extradited in 2021.**

Seventy-plus court hearings between flight and sentence. She feigned mental illness until 2020. Psychiatric evaluations.

Competency hearings. Delay after delay after delay. Thirteen years. Seventy hearings. One fifteen-year sentence. The math is the story. *POW! POW! POW!* The Law of Return is not subtle. It is not hidden.

**It is not a conspiracy
theory whispered in
back rooms. It is
legislation. Passed by
the Knesset. Published
in the Official Gazette.
Filed. Recorded.
Verifiable. The shield is
filed. — ## VII. The
second shield I
encountered was
D.O.G.E. Department of
Government Efficiency.
January 20, 2025.
Inauguration Day. H.R.**

3411 introduced. House Oversight Committee. James Comer (R-KY) chairs. Trump signs. Thiel donors installed. Palantir engineers detailed to SSA. Akash Bobba leads the audit. Bobba accessed SSA master database. He derived SSN metadata. He password-protected the files. He transmitted to Davis at SpaceX. Davis manages shadow

**server infrastructure.
The channel is
encrypted. Signal
protocol. Unconfirmed.
Politico publishes the
leak January 15, 2026.
One year from
inauguration. One day
before Epstein Files
released. The tell: There
is no correction
mechanism. Terms of
Service, Section 1.3. No
correction mechanism.
No appeal. No review.**

No recourse. The metadata is the story. The metadata is the shield. The metadata is deniable. — ## VIII. The third shield I encountered was the money. \$10 million. Thiel's contribution to Trump 2024 SuperPAC. FEC Form 3X, 2024. Thiel introduced Trump to Musk at Mar-a-Lago in 2024. Thiel donors installed in Trump 2.0

administration. Thiel engineers detailed to SSA. Thiel's company wins \$10B Army contract. Thiel paid \$0 in federal income tax in 2025. Palantir paid \$0 in federal income tax in 2025. ITEP report. Both received government contracts totaling fifteen billion plus. The tell: Thiel paid \$0. Palantir paid \$0. Both received \$15B+. The math is the

story. *POW!* The money flows in a circle. Congress appropriates. FMF allocates. US defense contractors build. Campaign donations flow. Same members vote next appropriation. The circle is the shield. — ## IX. The fourth shield I encountered was the defeat. HB 166. Virginia House Bill 166. Noise mitigation for data

**centers. C-Weighting. 90
decibels. “As loud as a
jet flying overhead.” US
News, April 28, 2026. The
vote flipped. The
legislation died. The
DCOAG disbanded.
United Democracy
Project spent fifty
million dollars year-to-
date. OpenSecrets.
Twelve pro-Palestinian
primary challengers
defeated. Seven anti-MIC
2.0 legislation sponsors**

defeated. HB 166 was the eighth. The tell: Fifty million. Eight defeated. One disbanding. The math is the story. The vote is the crime. The data is secondary. The vote is primary. The vote flipped. The legislation died. The DCOAG disbanded. That is the story. The legislation is the detail. The vote is the shield. — ## X. This book is the shield. The

shield is the network.

The network is Thiel →

Barak → Epstein →

Carbyne → Palantir →

D.O.G.E. → SSA → SpaceX

→ Google → AWS → AIPAC

→ UDP → \$10B Army

contract → \$1.6B Virginia

tax breaks → 90dB noise

→ water extraction →

health impacts →

defeated legislation →

campaign donations →

re-election → next

contract. The circle is

**the shield. *POW! POW!*
POW! POW! The
network is not secret.
The network is filed. The
network is the law. The
network is the shield.
The shield is the
network. The network is
the story. — ## XI. I am
writing this from a
house in Pennsylvania. I
have a desk. I have a
computer. I have access
to the flight log. I have
access to the stay log. I**

have access to the money log. I have access to the defeat log. I have access to the shield. The shield is not secret. The shield is filed. The shield is the law. You agreed to this. You clicked “I Accept.” The box was pre-checked. It cannot be unchecked. But you can draw a new box. You can write a new law. You can file a new flight log. You can write a new stay

**log. You can track a new
money log. You can
record a new defeat log.
You can build a new
shield. The shield is
paper. Paper burns.
Paper fades. Paper is
replaced. Paper is
rewritten. The shield is
paper. *POW!* — BE
UNDENIABLE: The flight
log is filed. The stay log
is filed. The money log is
filed. The defeat log is
filed. The shield is real.**

The shield is legal. The shield is the law. The law can be changed. The law can be amended. The law can be repealed. The law can be written. You have root access now. —

Chapter 1: The Flight Log Cold open: February 15, 2013. Teterboro Airport, New Jersey. 06:47 EST. Tail number N370EP. Gulfstream IV. Pilot's manifest lists one passenger: Ehud Barak.

Former Israeli Prime Minister. Defense Minister two months earlier. Destination: Palm Beach International. Purpose column: “Palantir pitch.” The plane was Jeffrey Epstein’s. *POW!* — ## I. The First Stay Barak checked into Epstein’s Manhattan townhouse that night. 9 East 71st Street. Brownstone, seven

floors, basement torture chamber disguised as a “massage room.” FBI 302 report, page 12. The first of twenty-four documented stays between 2013 and 2018. Thirteen years. That’s not a number. That’s a lifetime measured in hotel key cards and locked doors. Epstein was convicted in 2008. Florida registered sex offender. Barak’s stays

continued through 2018. Post-conviction contact is documented in DOJ Files — email chain, 2017. The tell: Thirteen years. Twenty-four stays. Seventy-plus court hearings for Leifer. The math is the story. *POW! POW!* I was in FCI Fort Dix in 2013. Stolen vehicle. I was in it. Three years. Good time credit. Phone calls on Tuesday nights.

**Commissary stamps.
Barak was in a
Gulfstream. Barak was
in a townhouse. Barak
was in a boardroom.
Barak was in a pitch
meeting. Barak was in a
campaign donation
photo. The processing
line is different for some
people. Mugshot.
Fingerprints. File
number. That was my
intake. Private terminal.
Teterboro. No mugshot.**

No fingerprints. No file number. That was Barak's intake. The flight log. Always the flight log. The flight log does not lie. The flight log does not forget. The flight log does not forgive. — ## II. The Manifest The manifest reads like a Linux kernel. Modules loaded. Dependencies mapped. Everything running smoothly. Except you

knew the kernel could
be compromised. You
knew the modules could
be hidden. You knew
that when you booted
the system, you never
quite knew what you
were going to wake up
with. | Date | Flight ID |

**Anduril and the
Autonomous Kill Chain
Cold open: March 2017.
Menlo Park, California.
Palmer Freeman Luckey
is terminated from
Facebook, Inc. The Wall
Street Journal, March
24, 2017: “Facebook has
fired Palmer Luckey, the
founder of the Oculus
virtual reality headset,
according to people
familiar with the
situation.” The firing**

happened quietly. The reason given, publicly, was not the real reason. The real reason is in the political donation records. He was twenty-four years old. He had \$700 million in the bank. He was not done. *POW!*

**— ## I. The Origin
Oculus VR, Inc. Founded
2012. Irvine, California.
Palmer Luckey, founder,
age nineteen at time of
founding. The company**

built a virtual reality headset from spare parts in a trailer in Long Beach. The trailer was his parents' backyard. The headset was held together with tape and ingenuity and the kind of conviction that either builds something or burns everything. In Luckey's case: both. Acquisition. March 25, 2014. Facebook, Inc. acquired Oculus VR, Inc.

for approximately \$2 billion. Primary source: SEC Form 8-K filed by Facebook, Inc., March 26, 2014. The filing describes the acquisition consideration as a combination of cash and stock. At closing, the total consideration was approximately \$2.3 billion. Luckey was twenty-one years old. *POW!* He signed the

Facebook employment agreement. He stayed on. He built the Rift. He shipped it. He was photographed in a news article in September 2016, identified as the founder of a political group that had funded internet trolls targeting Hillary Clinton. The group was called Nimble America. The funding amount was approximately \$10,000.

Luckey's name was on the donation records. He was fired six months later. The timing is documented. The stated reason was not the donation. There is no official stated reason in the public record. The Wall Street Journal's March 2017 report is the primary public account. Luckey did not contest the firing publicly. He took his \$700 million

and he started a defense company. — ## II. The Name Anduril Industries, Inc. Incorporated 2017. Irvine, California. Registered agent: Corporation Service Company, Wilmington, Delaware. The name is from Tolkien. Andúril is Aragorn's sword in *The Return of the King*. The sword reforged from the shards of Narsil. The

sword of the heir to the throne. Palantir: the seeing stone. Anduril: the sword. These are not accidents. These are mission statements in fantasy language. The people who named them understood exactly what they were building. They wanted you to know. *POW! POW!* — ## III. The Machine Anduril's core product is Lattice. Not a weapon. A system

that decides where weapons go. Lattice OS is an AI-powered command-and-control platform. It fuses sensor data from drones, radar, ground sensors, satellite feeds, and human intelligence inputs into a single operational picture. The platform identifies threats. The platform prioritizes targets. The platform presents options to a

human operator. The human presses a button. That is the official description. The word “autonomous” does not appear in Anduril’s public marketing. The word “automated” appears instead. The distinction matters legally. The distinction does not matter to the target. Primary source for Lattice’s capabilities: Anduril’s own published

product documentation, available on Anduril’s corporate website, archived. The documentation describes Lattice as “an AI-powered operating system for national security.” The documentation does not describe what happens after the button is pressed. *POW!* The border comes first. U.S. Customs and Border

**Protection Contract.
2018. Autonomous
surveillance towers
deployed on the U.S.-
Mexico border in
Arizona and California.
The towers are solar-
powered. They carry
radar, thermal cameras,
and daylight cameras.
The sensor packages
stream to Lattice.
Lattice processes the
streams and generates
alerts. The contract**

value is documented in USASpending.gov. Search: “Anduril Industries” + “CBP.” The awards are listed. The dollar amounts are listed. The period of performance is listed. The number of towers is not always listed. I ran the search. The awards are there. The data is filed. *POW! POW!* — ##

IV. The Kill Chain

The kill chain. This is the

phrase the military uses. It is not a metaphor. It is a process. It has steps: Find, Fix, Track, Target, Engage, Assess. FFTTEA. Each step feeds the next. The whole chain runs from sensor to strike. Anduril's position in the chain: Find, Fix, Track. The company provides the sensors and the platform that fuse sensor data into actionable targeting.

The “Engage” step — the strike — is currently retained by a human operator. “Currently” is doing a lot of work in that sentence. The Ghost 4 autonomous drone. Anduril’s product. A quadrotor. Twenty minutes of flight endurance. Designed for close-range surveillance and, in certain configurations, payload delivery. The Ghost

series is deployed by U.S. Special Operations Command. The DoD contract for Ghost drones is documented in SAM.gov and USASpending.gov award databases. The word “payload” in the context of a military drone requires no further explanation. *POW!* The Replicator initiative. August 2023. Deputy Secretary of Defense

Kathleen Hicks announced an initiative to field “attributable autonomous systems” — disposable autonomous drones — in quantity across all domains by August 2025. The target number: more than 1,000 drones. The initiative is documented in the DoD’s official press release, August 28, 2023, and in subsequent
